

Bonn Lectures in Global Health – GLOHRA on Tour

1. Date and place

- 8. November 2021, 18:00- ca. 20:00
- Hörsaal 1, Hauptgebäude Universität Bonn
- Online via Zoom

2. Background

Bonn Lectures in Global Health organized by the Section Global Health - University Hospital Bonn

The lectures aim to increase the visibility of Bonn's global health research activities and global partnerships, not only in the new Global Health section, but also in other areas of the University Hospital, the University of Bonn and its academic partner institutions in Bonn.

GLOHRA

The German Alliance for Global Health Research (GLOHRA) is a proponent for interdisciplinary and collaborative global health research. The complex challenges we face today – neglected tropical diseases and antibiotic resistance, social and environmental determinants of health, but also mental illness and diabetes together with achieving universal health coverage and the human right to health – requires informed collaboration among researchers and other stakeholders.

GLOHRA aims to strengthen global health research in Germany by connecting a community of qualified researchers, funding groundbreaking research projects and scientific events, supporting the next generation of researchers, and enhancing cross-sector collaboration. We place particular importance on cross-institutional and transdisciplinary efforts, knowing that our best research is collaborative.

3. GLOHRA on Tour

GLOHRA on Tour is a hybrid-format for researchers in Bonn who are interested in global health research. We will present GLOHRA's activities that aim to foster global health research in Germany and explain how you can get involved.

4. Program

Time	Agenda	Presenters
18:00 – 18:45	Introduction of global health and GLOHRA	Nora Anton, Maeve Cook-Deegan, Leah Goodman, Esther Evang
18:45 – 19:30	Q & A Session	all
19:30 – 20:00	Informal exchange	

5. Participation

We invite senior and early career researcher, as well as master students who are interested in global health research. GLOHRA's conception of global health research is inclusive and acknowledges the broad range of topics that it encompasses. Our members are active in biomedical science, public health research, social sciences and humanities, as well as engineering and other sciences.

On-site Participation

Please note that the 3G-rule will apply and you will be asked to show proof of immunization, recovery certificate or a negative COVID-19 test (not older than 48h) upon entry.

Online Participation

Please write to academy@globalhealth.de to request the Zoom link for the GLOHRA on Tour session.
